PROFESSIONAL SUMMARY

Currently 4th-year Bachelor of Science in Computer Engineering student with a strong interest in software development, web technologies, IoT, and embedded systems. Experienced through academic and personal projects in building websites, developing Arduino-based systems, and strengthening programming and problem-solving skills. Seeking opportunities to apply technical knowledge, learn from real-world projects, and grow toward a career in software engineering.

EDUCATION

Bachelor of Science in Computer Engineering | Currently a 4th Year

STI COLLEGE BATANGAS | Expected Graduation: 2027

Relevant interests: Programming, Web Development, IoT, Embedded Systems, Arduino, and Software Engineering.

TECHNICAL SKILLS

Programming: Python, JavaScript

Web Development: HTML, CSS, responsive layouts, basic web interactivity

Embedded Systems: Arduino, sensors, motors, basic automation

Tools / Technologies: Git, GitHub

PROJECTS

Calculator Website | HTML, CSS, JavaScript

- Built a responsive calculator website to practice user interaction, layout, and basic programming logic.

Snake Game | HTML, CSS, JavaScript

- Developed a browser-based Snake Game to practice JavaScript logic, user interaction, and game mechanics.

Solar Panel Cleaning Robot | Arduino, sensors, motors

- Developed an Arduino-based engineering project exploring automation, sensor integration, motor control, and embedded-system concepts.

CERTIFICATES

Java Fundamentals | Add issuing organization and date

Siemens | Add issuing organization and date

CORE STRENGTHS

- Problem-solving and critical thinking
- Creative approach to project development
- Continuous learning and technology exploration
- Hands-on project development
- Interest in software engineering and emerging technologies
